

Please replace paragraph 0018 on pages 8-9 with the following text:

A₂ Moreover, it is another advantage of the present invention to provide a facsimile device which can send image data using the proper network automatically without users doing special operation, by deciding that image data is transmitted directly to the communication device using the public switched telephone network or that image data is transmitted using the computer communication network via the gateway device according to the content of the network information corresponding to the discrimination information, in case of accepting the discrimination information by memorizing the discrimination information of the receiving-side communication device and the network information showing the available network by making one of these information correspond to the other information.

Please replace paragraph 0019 on page 9 with the following text:

A₃ Furthermore, it is another advantage of the present invention to provide a facsimile device which can certainly carry out the transmission process of image data by sending the same image data directly to the communication device using the public switched telephone network in case of failing in the transmission process of image data using the computer communication network.

Please replace paragraph 0020 on page 9 with the following text:

A₄ Furthermore, it is another advantage of the present invention to provide a facsimile device which can transmit image data easily using the requested network, without users compulsively performing the confusing operation, by transmitting image data using the network shown in the network information in case of inputting the discrimination information such as the destination facsimile number that attached the network information showing which network is used between the public switched telephone

network or the computer communication network, by having a means for connecting the facsimile device to the computer communication network.

Please replace paragraph 0021 on pages 9-10 with the following text:

AS
Furthermore, it is another advantage of the present invention to provide a facsimile device which can send image data using the proper network automatically, without users performing the special operation, by sending image data using the network shown in the network information made to correspond to the discrimination information in case of selecting the discrimination information by users, by memorizing by making the receiving discrimination information correspond to the network information showing which network is used, by having a means for connecting the facsimile device to the computer communication network.

IN THE CLAIMS:

Please add the following new claims:

--15. (New) A facsimile device comprising:

Ac
a communication unit for communicating via a public switched telephone network, with a communication device connected to said public switched telephone network, and with a gateway device connecting said public switched telephone network to a computer communication network; and

a transmitting unit for transmitting an image data to said communication device or transmitting an image data and a discrimination information to said gateway device, based on the corresponding network information in case of inputting the destination discrimination information of image data and the network information.
